Forward-looking statements

• This presentation contains information about Melior Resources Inc. ("Melior") and should be read in conjunction with Melior’s public filings available at www.sedar.com and at www.meliorresources.com. The content of this presentation is not to be construed as legal, financial or tax advice. Any reader should contact his, her or its own professional advisors for legal, financial, tax or other advice.

• Certain information contained in this presentation, including the information contained in the Preliminary Economic Assessment (PEA), constitutes forward looking information under the provisions of Canadian securities laws. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the use of forward-looking terminology such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "projects", "potential", "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "should", "might" or "will be taken", "occur" or "be achieved" or the negative connotation. Such statements and information include, without limitation, statements regarding the possible future performance of operations at the Goondicum mine, the potential for resource expansion at the Goondicum mine and other aspects relating to the Goondicum mine. In addition, all of the results of the PEA represent forward looking information and statements. Statements in this presentation that constitute forward looking statements or information, include but are not limited to: commodities and price assumption, cash flow forecasts, projected capital and operating costs, recoveries, mine life and production rates, the financial results of the PEA including IRR and NPVs, as well as other assumptions used in the PEA. This forward looking information is subject to numerous risks, uncertainties and assumptions, certain of which are beyond the control of Melior including the impact of general economic conditions; industry conditions; volatility of minerals prices; volatility of commodity prices; currency fluctuations; mining risks; risks associated with foreign operations; governmental and environmental regulation; competition from other industry participants; the lack of availability of qualified personnel or management; stock market volatility. Readers are cautioned that the material assumptions used in the preparation of such information, although considered reasonable by management at the time of preparation, may prove to be imprecise. Actual results, future events, performance or achievement could differ materially from those expressed in, or implied by, this forward-looking information and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking information will transpire or occur, or if any of them do so, what benefits Melior will derive therefrom. Melior disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise except as required by applicable securities laws. Information in this presentation is necessarily summarized and may not contain all available material information.

For more information on the risks, uncertainties and assumptions that could cause Melior’s results, performance or achievement to differ from current expectations, please refer to the “Risk Factors” section of Melior’s Annual Information Form dated October 19, 2018, Melior’s third quarter Management’s Discussion and Analysis of Financial Condition and Results of Operations dated November 29, 2018, as well as Melior’s other public filings, available at www.sedar.com and at www.meliorresources.com. These factors should be considered carefully and prospective investors should not place undue reliance of the forward looking statement.
The expectations outlined in this presentation regarding the Goondicum mine represent the information contained in the Preliminary Economic Assessment (PEA) prepared in April 2018 independently by TZ Minerals International Pty Ltd for the purposes of National Instrument 43-101 and relies in part on inferred resources. As a result, the PEA is subject to increased uncertainty and technical and economic risks of mine failure and there can be no assurance that the report’s expectations will be achieved.

The PEA is preliminary in nature and includes Inferred Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral Reserves, and there is no certainty the PEA will be realized. Shareholders are strongly encouraged to refer to the complete updated technical report prepared in accordance with NI 43-101 in respect of the Goondicum mine, which includes the results of the PEA described in this news release, which has been filed on SEDAR at [www.sedar.com](http://www.sedar.com) under the Company’s profile.

The Qualified Persons for the PEA are:

Steven Gilman, BAppSc (Extractive Metallurgy), FAusIMM (CP) (105881), SME (1158500), employed by TZMI as Principal Consultant, was responsible for Sections 1,2,13,15,16,17,18,19,21,22,24,25,26,27.

Mineral Resources estimates were completed by H&S Consultants Pty Ltd (“H&SC”), a geological consultancy based in Sydney, NSW, Australia and are reported in accordance with Canadian Securities Administrators National Instrument 43-101.The effective date of the mineral resources estimates disclosed in this news release is December 16, 2017.

Simon Tear, BSc Hons (Mining Geology), P.Geo (Institute of Geologists of Ireland 17), EurGeol (26), employed by H&SC as a director and Consultant Geologist, was responsible (or partly responsible) for Sections 3,4,5,7,10,11,12,14,20,23,25,26,27.

Graham Lee, BSc (Geology), FAusIMM CP(geo) (101602), MAIG (1990, employed by Graham Lee and Associates Pty Ltd as a Director and Consultant Geologist, was responsible (or partly responsible) for sections 6,8,9,10,11,20,25,26.

<tr>
<td>Mr. McCauley has substantial mining experience, both technical and financial, and has been involved in the development of several major mining projects in Australia and Argentina, as well as turnaround and organizational restructuring of resource focussed corporations. Was previously CFO at ASX listed Felix Resources during the period where the market cap grew from $35 million to over $1 billion driven by project development and M&amp;A before becoming Managing Director of an Australian Private Equity Fund. Subsequently ran Belridge Enterprises Pty Ltd, the former owner of the Goondicum Project.</td>
<td>Mr. Buttenshaw is currently a Managing Director with Pala Investments Limited. Mr Buttenshaw has significant direct mining experience and more recently has worked closely with several of Pala’s portfolio companies including Sierra Rutile (AIM:SRX), Norcast Wear Solutions and Asian Mineral Resources (TSX:ASN), to assist in their execution of strategic plans, growth projects, product marketing strategy, development of corporate governance and achievement of operational goals. Martyn is currently a director of Melior and Kasbah Resources (ASX:KAS) and a former director of Asian Mineral Resources (TSX.V:ASN) and Sierra Rutile Ltd. Martyn holds an MBA (with distinction) from the London Business School and an MEng (First Class) in Mining Engineering from the Royal School of Mines, Imperial College, London.</td>
<td>Mr. Tibriwal has more than 20 years of accounting and finance experience as well as broad experience in the resources sector. Mr. Tibriwal is a chartered accountant and earned an MBA in Finance from Newport University. Mr. Tibriwal is also a graduate from Mumbai University and spent 10 years at Ernst &amp; Young, with the last four years as a partner before setting up his own financial consulting services group. Mr. Tibriwal was also formerly the chief financial officer of Carpathian Gold Inc. and Gravitas Financial Inc. Mr Tibriwal is based in Toronto, Canada.</td>
<td>Mr Lloyd is an experienced corporate finance adviser and has served as a director of a number of listed companies in the minerals, energy and engineering services sectors. His board experience includes roles as Chairman, Chairman of the Audit Committee, Chairman of the Takeover Response Committee and Chairman of the Remuneration Committee. He is currently the non-executive Chairman of the global engineering services company Ausenco Pty Ltd and a non-executive director of the Australian bauxite producer Metro Mining Limited. Mr Lloyd has also held senior executive roles with a number of Australian resource companies including RGC Limited where he was integrally involved in the merger of that company with Westralian Sands Limited to form Iluka Resources Limited in 1998. Mr Lloyd is based in Sydney, Australia.</td>

Focused & motivated board
Product Quality is Paramount

Sulfate ilmenite quality is about:
- TiO2 content
- Fe2O3 content
- Impurities such as Cr, P, radioactive minerals

Goondicum has a genuine top quality product anticipated to receive top tier pricing

Industry pricing forecasts are generally for average quality ilmenite

Goondicum AA Ilmenite is top quality

Sulfate ilmenite cross-border trade prices:
Mar 2016 – Mar 2018

Higher quality ilmenites

Source: TZMI May 2018
Goondicum will also produce Apatite

- A valuable agricultural by-product
- Rich in phosphate – 31% P2O5 with ability to refine further
- Low contaminants – very low cadmium, arsenic & lead
- Slow release refractory rock is ideal for organic fertilizer production
- No competing domestic supplier in Australia
- Life of mine off-take signed with domestic agriproducts manufacturer
- Potential to export to New Zealand for single super manufacturer

Provides significant cash flow upside potential
Goondicum - A compelling case for investment

160K
Tonnes ilmenite per annum (~84% of revenue)

40K
Tonnes apatite per annum (~16% of revenue)

- Simple mining process
- Zero strip ratio with no drill & blast
- Standard equipment & conventional processing
- Low operational risk
- High resource grade
- Top quality ilmenite & phos rock products
- PEA in line with internal feasibility and restart plan
- Potential for project expansion and extension
- Secure location in Australia near to Asian markets

Back in production since Nov 2018
Goondicum becomes a global supplier of titanium feedstock

1 Preliminary Economic Assessment announced April 2018. All amounts are after tax and in US$.
2 Excludes working capital requirements
3 Excludes commissioning period
4 Using exchange rate of US$0.76

First three 3yrs of production yield USD44 million free Cash<sup>1</sup>
Goondicum commissioning progressing

Focus on achieving 14kt ilmenite & 2.5kt apatite production per mth

1. Preliminary Economic Assessment announced April 2018.
2. Target is 60kt of ilmenite for FY2019.
3. Target is 14kt of apatite for FY2019.
Working through the “to do” list

- Initial geological block model reconciliation in progress - Indications are positive.
- FPP modifications performing very well – you get what you pay for.
- Slimes management appears to have some upside – secondary floc is doing its job.
- WCP is running well although some mods may be required to achieve the AA spec consistently. Selecting and training operators is the key.
- Logistics still to be optimized – first shipment of 17.5kt being loaded right now.
- Production first and then bear down on costs

Nothing identified to date to say it can’t be done
First Goondicum production in 2018

So far so good…
Large existing resource base

- The Goondicum deposit is comprised of ilmenite-rich oxidized gabbro from surface
- Potential to recover additional apatite, vanadium containing titano-magnetite and feldspar by-products
- The Goondicum deposit extends over the remaining Goondicum Crater area which is secured with an existing Mineral Development License application (MDL application)
- Additional areas for exploration within the Goondicum Crater have been identified

Upside exploration opportunity

- Mining lease occupies only 20% of Goondicum crater
- Exploration licenses encompass 28 km²
- Area demonstrates consistent geology and mineralization

Strong potential to expand production and extend mine life
Goondicum optimization a priority

The lowest risk, highest return investment is in Goondicum via:

1. Expansion of processing plant throughput
   - Sufficient ore within ML
   - Mitigates production fade
   - Very high financial return with low marginal cost of production
   - Dephos circuit enables this to happen

2. Construction of new access road
   - Reduces truck haul distance by 100km
   - Reduces costs by up to $15/t

This will significantly enhance Goondicum’s future
More growth through IP development

Browne Processing Technology

- Upgrades ilmenite
- Reduces energy costs
- Reduces consumable and maintenance costs
- Potential to attract premium selling price
- Upside to current Goondicum economics
- Applicable to other ore types such as bauxite
- Significant value potential in its own right

Potential game-changing technology
Melior Transitioning to Producer Status: 2018 was a foundation year

<table>

<th>Appointed new NED to the board</th>
<th>Restructured loan facilities with elimination of convert &amp; term extension</th>
<th>Negotiated binding merger agreement</th>
<th>Commenced production at Goondicum</th>
</tr>
</thead>
</table>

The Platform was put in Place...
Plenty more to come...

- Secure additional US$2.0 million WC facility
- Achieve budgeted production and cost at Goondicum
- Commence Goondicum optimization & expansion
- Progress Project Brown R&D
- Pay down outstanding debt
- Continue M&A search
- Continue building corporate capability

Consolidate the Platform and Keep Building
Melior Strategy

- Platform Asset
- Market Momentum
- Supportive Shareholders
- Management Capability

Growth via Goondicum restart & extension, & targeted M&A

1. **Goondicum Restart**
   - Production in Nov 2018
   - Cash positive by 2nd Qtr 2019

2. **Goondicum Optimisation**
   - Operating efficiencies
   - Market positioning
   - Throughput expansion
   - Eastern access road

3. **Project Development/Consolidation**
   - Patience and thorough analysis
   - Genuine value adding
   - Counter cyclical

   **Targeted M&A**
   - Mineral sands, industrial minerals, Speciality metals
   - Optimal capital structure

   **Goondicum Expansion**
   - Reserves expansion
   - Additional products
   - Targeted sell-down

   **Goondicum Restart & Extension**
