

March Quarter 2019 MD&A

About Melior

Melior Resources Inc is a TSXV-listed industrial minerals producer and is the owner and operator of the Goondicum ilmenite and apatite mine located in Queensland, Australia.

Further details on Melior and the Goondicum mine can be found at www.meliorresources.com and regulatory filings are available on SEDAR. Melior is incorporated under the provisions of the *Business Corporations Act* (British Columbia) and has a registered office in Vancouver, British Columbia. Melior is classified as a Tier 1 Mining Issuer under the policies of the TSX Venture Exchange.

MELIOR RESOURCES INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS – QUARTERLY HIGHLIGHTS MARCH 31, 2019

Goondicum Ilmenite & Apatite Mine

- **One Lost Time Incident occurred during the quarter**
- **Ilmenite production of 17,534 tonnes;
Apatite production of 1,917 tonnes**
- **Ilmenite sales of 17,600 tonnes; Apatite sales of 479 tonnes**
- **Total revenue generated of \$3.65M**
- **Operational focus is on increasing quantity and improving quality of production going forward**
- **No apparent reason why Goondicum mine should not achieve commercial production targets within the next few months**
- **Titanium feedstock market is strong with ilmenite pricing close to budget in AUD terms for high grade product**

This Management's Discussion and Analysis ("MD&A") of financial condition and results of operations of Melior Resources Inc. ("Melior" or the "Corporation") constitutes management's review of the Corporation's financial and operating performance for the three and nine months ended March 31, 2019 and the Corporation's financial condition and future prospects. Except as otherwise noted, this MD&A is dated May 30, 2019 and should be read in conjunction with the Corporation's unaudited financial statements and the notes thereto for the three and nine months ended March 31, 2019 and the Corporation's audited financial statements and the notes thereto and related MD&A for the fiscal year ended June 30, 2018. The Corporation prepares its financial statements in Canadian dollars and all amounts in this MD&A are expressed in Canadian dollars, unless otherwise stated. References in this MD&A to "US\$" are to United States dollars and references to "A\$" are to Australian dollars.

Overview

Melior Resources Inc. (Melior) is a TSX Venture Exchange listed company focused on assessing, developing and operating resource projects.

Melior's major asset is the Goondicum Ilmenite and Apatite Mine located at Monto in Queensland, Australia.

The Corporation commenced the restart of the Goondicum Mine in November 2018 which included a six-month pre-production program to complete project upgrades and recruit and train approximately 50 personnel prior to commissioning. The restart construction project was completed on budget and on schedule.

Ilmenite sales from the Goondicum Mine commenced in March 2019, with 17,600 tonnes shipped to customers in China.

Operations

Commissioning at Goondicum continued throughout the quarter with quarterly ilmenite production of 17,534 tonnes and apatite production of 1,917 tonnes against budget goals of 22,027 tonnes and 4,979 tonnes respectively.

Cumulative ilmenite production since the start of commissioning in November 2018 through to the end of March 2019 was 96% of budget with 22,813 tonnes produced against a budget of 23,723 tonnes.

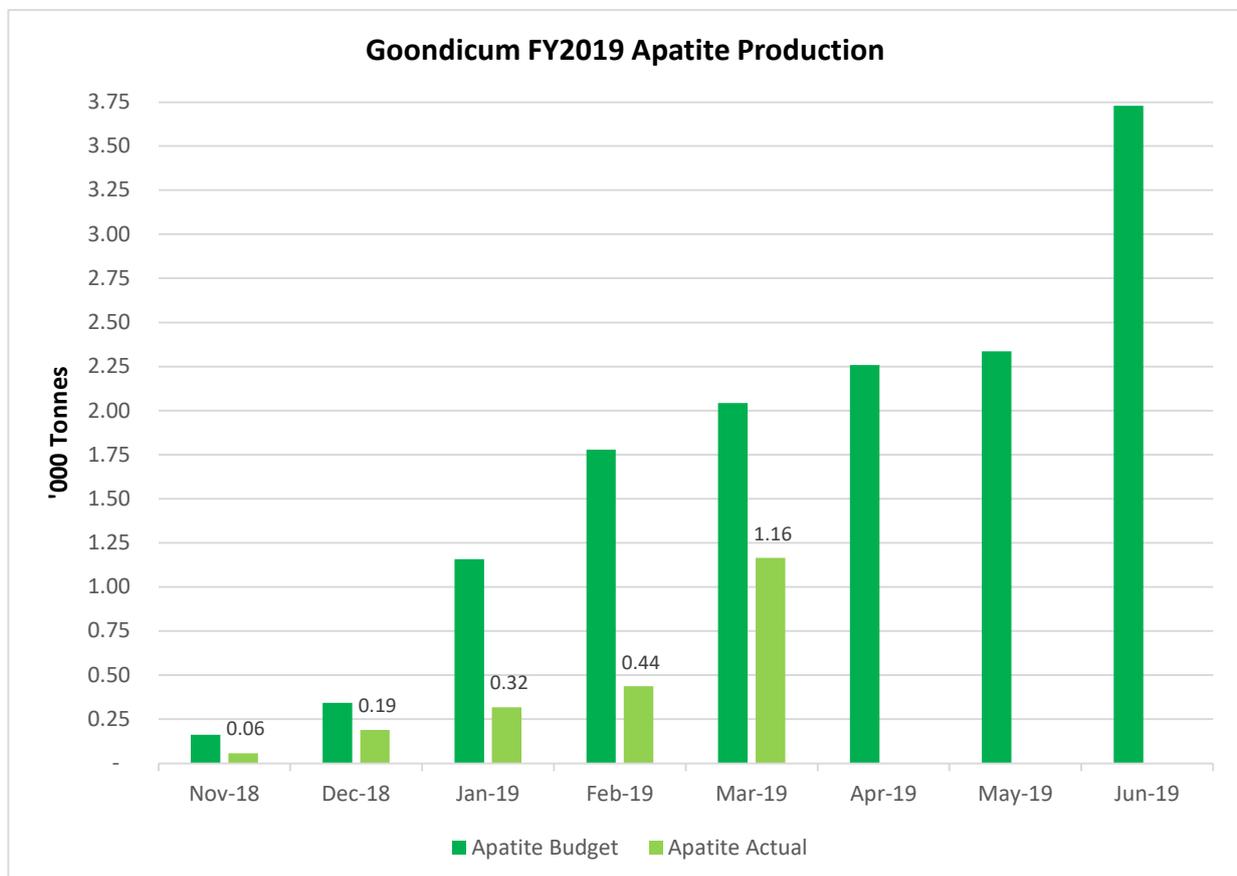

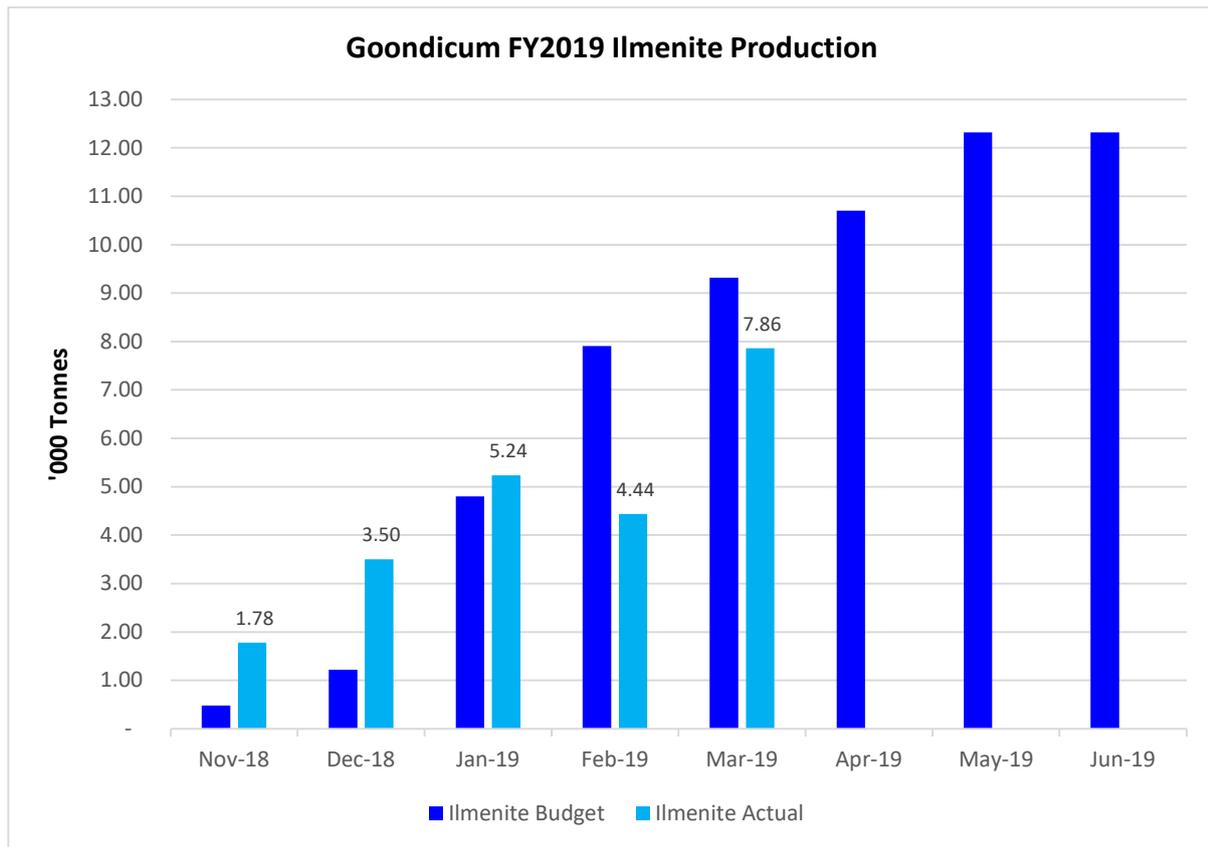

Subsequent production has not been as strong as planned. Although recent plant performance has reached 330 tonnes per day of ilmenite, this is yet to be achieved on a sustained basis and at the required quality levels.

Management is confident of reaching the projected production levels and cost targets although it is not expected that these will be achieved before the end of the June quarter 2019.

The following points are of note:

- Apatite production has been below budget since the resumption of operations in November 2018, averaging 33 tonnes per day (tpd) for March against a budget of 70tpd. However, as a result of minor plant modifications, subsequent production has improved materially.
- Ilmenite production has also performed below expectations for March, averaging 257tpd against a budget average of 328tpd. The underperformance is largely throughput related and actions to increase the hourly plant throughput are underway. The project is expected to achieve a consistent production level of 460tpd at full production.
- The consistent production of AA quality ilmenite has taken longer than planned. However, modifications to the dephos circuit are leading to a gradual improvement in product quality and we expect to consistently produce AA product in due course. The lower than planned product quality is reflected in lower than forecast project revenue.
- Notwithstanding delays in achieving the targeted quality and the need for modest price discounts to introduce the Goondicum product to the market, current ilmenite market prices, in Australian dollar terms, are close to the budgeted \$275/t for the AA specification ilmenite. Ilmenite demand remains strong with continuing enquiries globally for Goondicum ilmenite products.

No Lost Time Incidents were recorded during March.

Selected Financial Information

	Years Ending June 30		
	(in \$ thousands)		
	2018	2017	2016
Revenue from continuing operations	-	-	-
(Loss) from continuing operations	(6,714)	(4,126)	(19,634)
Earnings (loss) from discontinued operations	-	-	-
Net income (loss) for year	(6,714)	(4,126)	(19,634)
Basic earnings (loss) per share (\$) ⁽¹⁾ :			
Continuing operations	(0.24)	(0.17)	(0.93)
Discontinued operations	-	-	-
Total assets	13,721	12,360	13,085
Total short-term obligations	7,294	6,209	5,119
Total long-term obligations	4,832	909	853

(1) Basic and dilutive loss per share is calculated by dividing the net loss by the weighted average number of shares in issue during the year. As a result of consolidated net losses, the potential effect of exercising stock options and, as applicable, warrants have not been included in the calculation of loss per share because to do so would be anti-dilutive.

	Three months ended March 31		Nine months ended March 31

Results of Operations

Three and nine months ended March 31, 2019, compared with the three and nine months ended March 31, 2018.

The Corporation reported a loss from continuing operations of \$5.03 million and \$13.20 million for the three and nine months ended March 31, 2019, respectively. For the same periods in 2018, the Corporation incurred losses of \$1.11 million and \$3.34 million respectively.

The increase in the net loss from continuing operations of \$3.92 million and \$9.86 million for the three months and nine months ended March 31, 2019, respectively was largely due to:

- Commissioning operations at the Goondicum Mine
- Additional interest and expenses incurred on the outstanding debt
- Professional fees incurred on the terminated merger with Metallica Minerals

Liquidity and Capital Resources

The continuing operations cash and cash equivalents balance as at March 31, 2019, was \$183,000 compared to \$1.7 million as at June 30, 2018.

As at March 31, 2019, the Corporation had \$668,000 available to be drawn down under debt facilities with Hainan Wensheng.

The Company had negative working capital of \$1.37 million, as at March 31, 2019 (June 30, 2018 – negative working capital of \$5.23 million).

The Corporation continues to review its options with respect to ensuring that it has sufficient capital to meet its obligations as they come due.

Commitments & Contingencies

As at March 31, 2019, \$7.01 million of the Corporation's obligations were current and due within the year.

The Corporation's non-current obligations of \$28.87 million as at March 31, 2019, were comprised primarily of unearned revenue resulting from the first advance under the Hainan Wensheng off-take agreement, the Pala debt facility and a decommissioning liability, which is secured by a term deposit.

Debt

As at March 31, 2019, the Corporation had \$24.02 million (June 30, 2018 – \$5.26 million) outstanding on a secured loan constituting the Pala Facility and \$6.01 million (June 30, 2018 – \$3.29 million) outstanding by way of an advance under the off-take agreement with Hainan Wensheng.

Related-Party Transactions

Remuneration of key management personnel of the Corporation was as follows:

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2019	2018	2019	2018
Salaries and benefits	\$ 133	\$ 119	\$ 372	\$ 461
Directors fees	\$ 35	\$ 11	\$ 120	\$ 14
Shared based payments	\$ 28	\$ 48	\$ 120	\$ 188

The Corporation and Goondicum Resources have entered into an Advisory Services Agreement (ASA) with Pala (a significant shareholder) to provide the Corporation with consultancy support. The Corporation incurred consultancy fees for the nine months ended March 31, 2019 of US\$60,000 (nine months ended March 31, 2018 Nil). Included in accounts payable and accrued liabilities as at March 31, 2019 was US\$60,000 (June 30, 2018 Nil) pertaining to these fees.

The Corporation restructured the secured loan agreement with Pala during the quarter and incurred interest and fees on the Pala loan of \$942,000 (2017 – \$291,000)

See also "Commitments and Contingencies" and "Debt" for details of the secured loan with Pala which constitutes a "related party transaction" within the meaning of MI 61-101.

Risk Factors

Business Risk Factors:

The Corporation is exposed to a number of risks and uncertainties. Such risks could materially affect the Corporation's future results and could cause actual events to differ materially from those described in forward-looking statements relating to the Corporation. The risks described herein, or in documents incorporated by reference herein, may not be the only risks facing the Corporation. Additional risks not currently known or not currently considered to be material may also have an adverse impact on the Corporation's business.

Dependence on the Goondicum Mine

The Corporation is primarily focused on the development of the Goondicum Mine. The Corporation does not own any significant assets other than the Goondicum Mine, which would be the Corporation's only mineral property and represents the Corporation's only immediate potential for future generation of operating revenues. Unless the Corporation acquires additional property interests, any adverse developments affecting the Goondicum Mine such as, but not limited to, delays in or failure to successfully restart production, obtaining project financing beyond the Corporation's initial investment on commercially suitable terms, hiring suitable personnel and mining contractors, or securing supply agreements on commercially suitable terms, could have a material adverse effect upon the Corporation and would materially and adversely affect the potential mineral resource production, profitability, financial performance and results of operations of the Corporation.

The Goondicum Mine may not meet its production targets or its cost estimates

The restart of the Goondicum Mine is premised on projected production, capital and operating cost estimates. The Corporation's ability to meet ilmenite production targets is dependent on the successful restart of the mine and expansion of mining operations in the future. Meeting these

targets will also depend on the accuracy of predicted factors including capital and operating costs, metallurgical recoveries, resource estimates, future commodity prices, accuracy of applicable technical studies and reports, acquisition of land and surface rights and issuance of necessary permits/approvals. There is no assurance that the mining operations will be expanded or that mining operations will be profitable if expanded. Actual production and costs may vary from the estimates for a variety of reasons such as grade, tonnage, dilution and metallurgical and other characteristics of the ore mined varying from estimates, revisions to mine plans, risks and hazards associated with mining, adverse weather conditions, unexpected labor shortages or strikes, equipment failures and other interruptions in production capabilities. Production costs may also be affected by increased stripping costs, increases in level of ore impurities, labor costs, raw material costs, inflation and fluctuations in currency exchange rates. Failure to achieve production targets or cost estimates could have a material adverse impact on the Corporation's sales, profitability, cash flow and overall financial condition and performance.

Exploration and Estimates of Mineral Reserves and Resources

Mineral exploration and development involves a high degree of risk. Success in exploiting mineral resources and reserves is the result of a number of factors, including the level of geographical and technical expertise, the quality of land available for exploration and other factors. The economics of developing mineral properties are affected by many factors including the cost of operations, variations in grade, fluctuation in prices and fluctuation in exchange rates. Failure to meet project delivery timetables and budgets may impact potential performance, delay cash inflows and increase capital costs.

Mineral reserves and resources estimates for projects are based on the interpretation of geological data obtained from drill holes and other sampling techniques and feasibility studies which derive estimates of costs based upon anticipated tonnage and grades to be mined and processed. There are numerous uncertainties inherent in estimating ore reserves and assumptions that are valid at the time of estimation however may change significantly when new information becomes available. Changes in the forecast prices of commodities, exchange rates, production costs or recovery rates may change the economic status of reserves and may, ultimately, result in the reserves being restated.

Melior had previously elected to restart the Goondicum Mine based on management's objectives based on internal analysis and studies of project scope, capital costs and production plans (the "Internal Analysis") which details the scope of the project, calculates the required project capital to achieve production targets and shows the anticipated cash cost of production and return on capital. Pursuant to Section 4.2(6) of the Companion Policy to National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101"), due to this work being undertaken on inferred resources, the Corporation does not disclose project reserves or any associated information pertaining to the project. The Corporation's Internal Analysis in respect of the Goondicum Mine is preliminary in nature, includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves and there is no certainty that management's expectations will be realized.

Section 4.2(6) of the Companion Policy to NI 43-101 recognizes that there may be situations where the issuer decides to put a mineral project into production without first establishing mineral reserves. Mineral resources are not mineral reserves and do not have demonstrated economic viability. There is no certainty that all or any part of the mineral resources estimated will be converted into mineral reserve. Historically, such projects have had a much higher risk of economic or technical failure. As the Internal Analysis in respect of the Goondicum Mine has been largely based around indicated and inferred resources, Melior acknowledges that this could result in increased uncertainty and technical and economic risks of project failure.

Mineral Titles

Although the Corporation has obtained a title opinion for the tenements underlying the Goondicum Mine, there is no guarantee that title to such mineral property interests will not be challenged or

impugned and no assurances can be given that there are no title defects affecting its mineral properties. The Corporation's mineral property interests may be subject to prior unregistered agreements or transfers and title may be affected by undetected defects.

Operating risks

Once the Goondicum Mine is operational, the activities of the Corporation will also be subject to all of the hazards and risks normally associated with exploration, development and operation of natural resource projects. These risks and uncertainties include environmental hazards, industrial accidents, labour disputes, mechanical failures of the mining equipment or other key plant or machinery, grade problems, transportation problems and periodic interruptions due to inclement or hazardous weather conditions and other acts of God. Should any of the risks affect the Corporation, its business, operations or assets, it may significantly reduce production for prolonged periods and cause the cost of production to increase to a point where it would no longer be economical to continue operations.

Volatility of Mineral Prices

The future profitability of the Corporation will depend on the market price of ilmenite and apatite. Mineral prices fluctuate widely and are affected by numerous factors beyond the Corporation's control, including global supply and demand, political and economic conditions, advancements in mineral processing and currency exchange fluctuations. The effect of these factors on the price of the minerals that the Corporation sells cannot accurately be predicted.

Government Legislation & Policies

Melior's operations are subject to government legislation, policies and controls relating to prospecting, land use, trade, environmental protection, taxation, rates of exchange, return of capital and labour relations. Its exploration operations may be affected in varying degrees by the extent of political and economic stability and by changes in regulations or shifts in political or economic conditions that are beyond the control of the resource issuer. Such factors may adversely affect Melior's business and/or its property holdings. Although Melior's exploration activities may be carried out in accordance with all applicable rules and regulations at any point in time, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner that could limit or curtail production or development of Melior's operations. Amendments to current laws and regulations governing the operations of Melior or more stringent enforcement of such laws and regulations could have a substantial adverse impact on its financial results.

Government Regulations, Licenses and Permits

Exploration and development activities and mining operations are subject to laws and regulations governing health and worker safety, employment standards, environmental matters, mine development, prospecting, mineral production, exports, taxes, labour standards, reclamation obligations and other matters. It is possible that future changes in applicable laws and regulations, or changes in their enforcement or regulatory interpretation could result in changes in legal requirements or in the terms of permits applicable to the Corporation or its properties which could have a material adverse impact on the Corporation's business. Obtaining necessary permits and licences can be a complex, time consuming process and there can be no assurance that required permits will be obtainable on acceptable terms, in a timely manner, or at all. The costs and delays associated with obtaining permits and licenses and complying with these permits and licenses and applicable laws and regulations could stop, materially delay or restrict the Corporation from proceeding with the exploration and development activities or the operation or further development of a mine.

Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in enforcement actions, including orders issued by regulatory or judicial authorities causing interruption or closure of exploration, development or mining operations or material fines and penalties, including, but not limited to, corrective measures requiring capital expenditures,

installation of additional equipment, remedial actions or other liabilities. Parties engaged in mining operations or in the exploration or development of mineral properties may be required to compensate those suffering loss or damage by reason of these activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

In addition, amendments to current laws and regulations governing the Corporation's activities or more stringent implementation thereof could have a substantial adverse impact on the Corporation and cause increases in exploration expenses, capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Uninsurable Risks

In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions including fires, flooding and earthquakes may occur. It may not be possible to insure fully or at all against such risks and the Corporation may decide not to take out insurance against such risks as a result of high premiums or other reasons. Should such risks arise, they could reduce or eliminate the funds available to the Corporation to fund its operations or investments, increase costs to the Corporation, reduce future profitability and/or materially adversely affect the Corporation's financial condition.

Environmental Regulation

Melior's operations are subject to environmental regulations enacted by government agencies from time to time. A breach of such legislation may result in the imposition of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner which has led, and is likely to continue to lead, to stricter standards and enforcement and greater fines and penalties for non-compliance. The cost of compliance and risk of non-compliance with government regulations may reduce the profitability of Melior's operations.

Rehabilitation

Costs associated with rehabilitating land disturbed during the mining process and addressing environmental, health and community issues are estimated and provided for based on the most current information available. Estimates may, however, be insufficient, inaccurate and/or further issues may be identified that were not previously anticipated or accounted for by management.

Attraction and Retention of Personnel

The Board may experience delays in hiring, or be unable to hire or retain, experienced and qualified new management for the Corporation within the timeframes necessary or upon terms acceptable to the Corporation. The competition for qualified personnel in the mining and metallurgical industry is intense and there can be no assurance that the Corporation will be able to attract and retain the personnel necessary for the implementation of its business strategy.

Reliance on Key Personnel

Melior is dependent upon the personal efforts, performance and commitment of its management and the Board, who are responsible for the future development of Melior's business. Melior will be relying upon the business judgment, expertise and integrity of Melior's management and the Board. To the extent that the services of any member of management or the Board became unavailable for any reason, a disruption to the operations of Melior could result and may delay the implementation of the Corporation's business strategy.

Conflicts of Interest

Melior's Directors and officers may serve as directors or officers of other companies in the same business as Melior, natural resource companies or companies providing services to Melior, or they may have significant shareholdings in natural resource companies. To the extent that such

companies participate in transactions in which Melior participates, the Directors may have a conflict of interest in negotiating and concluding terms to the extent of such participation. Confidentiality and judiciary conflict issues may arise, and any Director may be recused from participating in or voting at a Board meeting. If a conflict of interest arises at a Board meeting, any Director who has a conflict will abstain from voting in connection with the transaction in accordance with the Business Corporations Act (British Columbia).

Financial Instruments and Associated Risks:

The Corporation has classified its cash and cash equivalents as cash and cash equivalents, which are measured at cost. Payables and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

The carrying value of cash and equivalents, deposits, receivables, accounts payable and accrued liabilities reflected in the consolidated statement of financial position approximate fair value because of the short-term nature of these instruments.

The Corporation's risk exposures and the impact on the Corporation's financial instruments are summarized below:

Foreign Currency Risk

Cash and cash equivalents are comprised of cash at banks and on hand, and short-term money market instruments with an original maturity of three months or less. As at March 31, 2019, A\$160,000 was held in Australian dollars and only a nominal portion of the Corporation's cash and cash equivalents were held in United States dollars. Accordingly, management believes that the Corporation is not exposed to material foreign exchange risk for cash and short-term money.

The Corporation's US dollar debt balance at March 31, 2019, was US\$22.48 million. Accordingly, management believes that the Corporation is exposed to material foreign exchange risk until revenue from the Goondicum Mine increase. The rate published by the Bank of Canada at the close of business on March 31, 2019, was US\$0.75 per Canadian dollar and at noon on March 31, 2019, was A\$1.05 per Canadian dollar.

Revenue from the Goondicum Mine will be in US dollars. Therefore, once the project is restarted, the Corporation will be exposed to fluctuations in Australian and US dollars. Accordingly, the Corporation is subject to the risks inherent in exchange rate fluctuations.

The Corporation does not use derivative instruments to reduce its exposure to foreign currency risk.

Capital Risk Management

The Corporation defines capital as total shareholders' equity including share capital, other reserves and deficit. The Corporation manages its capital to ensure that adequate funds are available to settle its liabilities as they arise and reviews and evaluates investment opportunities that are achievable within existing resources.

The Corporation is not subject to any externally imposed capital requirements including by a regulator or lending institution.

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Corporation is subject to credit risk primarily attributable to its cash and short-term investments.

The Corporation's main credit risk arises from its cash and cash equivalents deposits with banks. All of the Corporation's cash and cash equivalents are with one major Canadian or Australian chartered bank, from which management believes the risk of loss to be remote. The Corporation

limits its counterparty credit risk on its deposits by dealing only with financial institutions with AA or above credit ratings.

Liquidity Risk Management

The Corporation manages liquidity risk by maintaining adequate cash balances and loan facilities in order to meet liabilities as they come due.

The financial liabilities or commitments of the Corporation that bear interest is the \$19.7 million loan facility.

Interest Rate Risk Management

The Corporation has cash balances that earn interest subject to fluctuations in the prime rate. The Corporation's current policy is to invest excess cash in bank institution savings accounts. The Corporation periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Management believes the interest rate risk is remote as investments have maturities of three months or less and the Corporation currently does not carry interest bearing debt at floating rates.

Outstanding Share Data

As at May 30, 2019, the Corporation has 29,729,963 Common Shares outstanding, which are listed on the TSX Venture Exchange under the symbol "MLR". The Corporation also has 866,667 stock options and 1,624,750 warrants (each exercisable for one common share) outstanding which, if exercised, would result in proceeds of approximately \$2.43 million).

Additional Information

Additional information relating to the Corporation, is available for viewing on SEDAR at www.sedar.com and on the Corporation's web site at www.meliorresources.com. The Corporation cautions that information contained on, or accessible through, these websites is current only as at the date of such information.

Forward Looking Statements

Forward Looking Statements Disclaimer: Certain statements in this MD&A that are not current or historical factual information may constitute "forward-looking" statements within the meaning of applicable securities laws, regarding, among other things, the beliefs, plans, objectives, strategies, estimates, intentions or expectations of the Corporation, including as they relate to its financial results and the ability to execute on its investing and business strategies. Inherent in these forward-looking statements are known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Corporation to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such statements can often be identified by the use of words such as "may", "will", "expect", "believe", "plan", "intend", "anticipate", "estimate" and other similar terminology. These statements reflect current expectations regarding future events and performance and speak only as of the date of this MD&A.

Similarly, statements contained in, but not limited to, the sections titled "Overview of the Corporation's Business", "Outlook", "Liquidity and Capital Resources", "Commitments and Contingencies" and "Off-Balance Sheet Arrangements" of this MD&A, including, but not limited to, the forecast operations performance at the Goondicum mine, an ilmenite and apatite mine located in Queensland, Australia (the "Goondicum Mine") and the future of the ilmenite market, dependence on the Goondicum Mine, the ability of the Corporation to meet its capital requirements and to repay the Pala Facility, the anticipated benefits of the PEA, expectations concerning the Corporation's financial condition, results of operations, business, assets, prices, foreign exchange rates, earnings, market conditions, capital expenditures, risks, availability of regulatory approvals, corporate objectives and plans or goals, are or may be forward-looking statements. Forward-looking statements involve significant risks and uncertainties, should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements including, but not limited to, the factors discussed under "Risk Factors". Although the forward-looking statements contained in this MD&A are based upon what management of the Corporation believes are reasonable assumptions, the Corporation cannot assure readers that actual results will be consistent with these forward-looking statements.

Investors and others should carefully consider risk factors including, without limitation, those set out under the heading "Risk Factors", and not place undue reliance on forward-looking statements. The Corporation anticipates that subsequent events and circumstances may cause the Corporation's views to change. Forward-looking statements are made as of the date of this MD&A and the Corporation assumes no obligation to update or revise any forward looking statements to reflect new events or circumstances, except as required by law.
